

TurboBronchial AirClean 1 L | 1L

Natural air improver based on selected essential oils

Product number	309
Weight	0.97kg
Length	88mm
Width	88mm
Height	230mm

Product description

Special product (liquid)

Natural air improver based on selected essential oils

TurboBronchial AirClean is a natural air freshener for nebulization based on selected essential oils. The respiratory tract is where most farms have the greatest performance reserves. The susceptibility to respiratory infections is low when the respiratory tract is in optimum condition. The active substances contained in the essential oils are important for the condition of the respiratory tract.

Cleaning the respiratory tract is particularly important in view of the high levels of germs and dust in stables. Regular use can improve the air in stables by binding ammonia and reducing germ pressure.

The temperature in the stable can be lowered by the essential oils in the water mixture enriched with **TurboBronchial AirClean**.

- Binding of ammonia in the air
- Reduction of the germ pressure in the air
- Lowering of the stable temperature
- Improvement of the stable air
- Soothing essential oils give the stable air a respiratory-friendly climate

Application recommendation: 20-70 ml/1000 L water. Nebulize 1-2 times daily as required. 1 L solution is sufficient for approx. 50-150 m² of stable area. The actual amount required depends on the conditions in the stable and the fogging technique used. With professional fogging technology, considerably lower application quantities per fogging are possible.

The user is responsible for the suitability of the technical systems for applying TurboBronchial CleanAir, and the use is therefore at his own risk! Rinse nebulization system with water after use!

L'utilisateur est responsable de l'adéquation des systèmes techniques pour l'application de TurboBronchial AirPur, et l'utilisation est donc à ses propres risques! Rincez le système de nébulisation à l'eau après utilisation!

DANGER • Contains cineole, (*E*)-anethole, limonene, thymol, (+)-bornan-2-one. Flammable liquid and vapour. May be fatal if swallowed and enters airways. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage. Toxic to aquatic life with long lasting effects. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. IF SWALLOWED: Immediately call a POISON CENTER/doctor. Do NOT induce vomiting. IF ON SKIN: Wash with plenty of water and soap. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Collect spillage. Dispose of contents/container to hazardous waste collection point.

Product properties

Area of Application	Stall
Special Requirements	Atemwege, Immunsystem, Stallklima, Vernebelung
Animal categories	Geflügel, Huhn, Pute, Wachtel, Rind, Kalb, Schaf, Ziege, Schwein, Ferkel, Alpaka, Kamel, Esel
Phase of life	Junior, Adult, Senior
Product type	Spezialprodukt (Füssigkeit)
