To promote sperm quality and sex drive in breeding males

Product number	630765
Weight	0.15kg
Length	67mm
Width	67mm
Height	119mm

Product description

Complementary feed (powder) for male dogs

To promote sperm quality and sex drive in breeding male dogs

Especially in older breeding males, sperm quality decreases naturally - sooner in some and later in others. **ProBreeder Go Boy Go** can then support sperm production and promote the quality of the ejaculate. The ingredients of **ProBreeder Go Boy Go** provide important sources of vitamin B, selenium, and folic acid, among other things, and can have a revitalizing effect.

In a scientific study in cattle, it was observed that the roots of Maca seemed to improve sperm quality and quantity to some degree, while mating behavior did not appear to be affected (<https://doi.org/10.1016/j.theriogenology.2010.01.028>).

Composition: malt germs, brewers' yeast, pumpkin seeds, ginkgo leaves, maca root

Analytical constituents: crude protein 35.1%, crude fat 3.8%, crude fiber 7.2%, crude ash 6.3%

Feeding recommendation: Add 1.5 g/5 kg body weight daily to the feed. 1 tsp. corresponds to ca. 3 g. Start feeding at least 5-7 days before the planned mating, for veteran males also as a 3-week cure 2 x a year.

Product properties

Anwendungsart	Fütterung
Product type	Ergänzungsfuttermittel (Pulver)
Feed Profile	Mineralstoffe / Spurenelemente, ohne Zusätze
Phase of life	Erwachsene, Senior
Special Requirements	Prostata, Fruchtbarkeit, Zucht, spermabildend
Composition	Malzkeime, Bierhefe, Kürbiskerne, Ginkgo, Maca
Animal categories	Dogs
