Product number	630760
Weight	0.1kg
Length	46mm
Width	46mm
Height	142mm

Product description

Care product for dogs

Hygienic agent for the intensive cleaning in the genital and teat area

Hygiene is important in breeding to prevent the spread of unwanted germs and other pathogens during mating, birthing, and rearing. With **ProBreeder Neat & Tidy**, cdVet offers an innovative product as a multi-problem solver.

Before mating, it is important to clean the genital area of the male and female dog and keep it as germ-free as possible in order to avoid infection and not to jeopardize the future litter. **ProBreeder Neat & Tidy** can also reduce the germ load in genital swabs. Cleaning the bitch around the time of birth, for example, can prevent the transmission of coli bacteria. **ProBreeder Neat & Tidy** is also suitable for cleaning the umbilical cord after birth.

In a special electrolysis process, a highly effective hygiene agent is produced which, after its cleaning effect, simply

decomposes back into its starting materials, water and salt. **ProBreeder Neat & Tidy** contains no surfactants, colorants, fragrances or preservatives and is fat and oil-free.

Composition: sodium-containing, electrolytical-energetically treated water

Application recommendation: Apply generously to the skin areas to be cleaned. For foreskin cleaning, draw onto a luer syringe (2.5 ml) if necessary. Repeat several times as required.

Store it cool and dark!

Product properties

Phase of life	Junior, Erwachsener, Senior
Anwendungsart	Äußere Anwendung
Product type	Pflege- & Hygienemittel (Flüssigkeit)
Special Requirements	Genitalbereich, Gesäugebereich
Animal categories	Dogs
