

ProBreeder Star Shine 400 g | 400 g

Vital substances to build up the fur after the seasonal change of fur, after the change of fur after heat or pregnancy, in case of fur loss

Product number	630790
Weight	0.4kg
Length	98mm
Width	98mm
Height	127mm

Product description

Complementary feed (powder) for dogs

Vital substances to build up the fur after the seasonal change of fur, after the change of fur after heat or pregnancy, in case of fur loss

Many breeders, especially of long-haired breeds, are familiar with the problem: shortly before the show season and the dog is practically naked - the bitch has just had a litter or summer is just around the corner and the fur is flying all over the house. But even dogs with short fur can get dandruff, dull or thinning fur after the winter heating period, after illness or in old age. Of course, special shampoos or conditioners can then be used, but experienced breeders know that the best way to promote fur is from the inside - i.e. through the feed.

With its versatile ingredients, **ProBreeder Star Shine** provides 'fuel' for the fur. The vitamin B complex, biotin and selenium it contains provide the foundation for growth and shine. Other ingredients can support pigment formation or provide important omega fatty acids. Zinc can also support fur growth.

Expert tip: Dog hair regrows in an average period of 6-8 weeks, so you need to be patient and feed **ProBreeder Star Shine** as a cure for at least 3 months in order to be able to observe the first visible success.

Composition: maerl, elderberries, linseed expeller, malt rootlets, milk thistle herb, wild pansy herb, wheatgrass root, stinging nettle herb, brewers' yeast cell walls (MOS), brewers' yeast, pumpkin seeds, seaweed meal, grape pips meal, ginkgo leaves, sea buckthorn berries, black cumin seeds, spirulina

Additives/kg: Technological additives: bentonite (1m558i) 30 g.

The total amount of bentonite must not exceed the permitted maximum level in complete feedingstuff of 20000 mg/kg of complete feedingstuff.

Analytical constituents: crude protein 17.5%, crude fat 5.9%, crude fiber 37.1%, crude ash 27.1%, calcium 7.62%, phosphorus 0.42%, magnesium 0.78%, sodium 0.40%

Feeding recommendation: Add 2.8 g/5 kg body weight to the feed 1 x daily for at least 3 months. 1 tsp. corresponds to ca. 2.6 g. Feed as a cure for at least 3 months. The cure is recommended in spring and fall at the usual fur changes or as required.

Product properties

Phase of life	Junior, Erwachsener, Senior
Anwendungsart	Fütterung
Product type	Ergänzungsfuttermittel (Pulver)
Feed Profile	BARF, ohne Zusätze
Special Requirements	Fell, Fellverfärbung, Fellwechsel, Gesundheit, Haut, kahle Stellen, stumpfes Fell, trockene Haut, Stoffwechsel, Zucht
Composition	Algenkalk, Holunder, Lein, Malzkeime, Mariendistel, Wildes Stiefmütterchen, Quecke, Brennnessel, Bierhefezellwände (MOS), Bierhefe, Kürbiskerne, Seealge, Traubenkerne, Ginkgo, Sanddorn, Schwarzkümmel, Spirulina
