

Wound Spray 250 ml | 250 ml

Protection of wounds from external influences thanks to breathable protective film with dragon's blood and propolis

Product number	10235
Weight	0.25375kg
Length	62mm
Width	62mm
Height	137mm

Product description

Care product (liquid) for pigs and cattle

Protection of wounds from external influences thanks to breathable protective film with dragon's blood and propolis

Our innovative **Wound Spray** combines the healing properties of dragon's blood - a natural tree resin from the Amazon region - with the antibacterial properties of propolis. This advanced duo provides a fast and effective support for wound healing.

Dragon's blood has been used in traditional medicine for centuries. It accelerates the healing process and forms a natural, breathable protective film over the wound. It promotes cell renewal and can, therefore, support natural wound healing. Propolis is particularly beneficial for stressed and irritated skin, for example after minor skin irritations or slight abrasions.

Composition: aqua, propane-1,2-diol, dragon's blood, propolis tincture

Application recommendation: Shake before use! Clean the affected area and apply the spray at a distance of ca. 10-15 cm. The spray dries quickly and protects the wound from external influences such as dirt, moisture and germs. Avoid eye contact!
