

EquiGreen ToxiVet sorb 2.5 kg | 2,5 kg

For demand-oriented feeding of metabolically sensitive horses with toxin-binding and prebiotic properties

Product number	343
Weight	2.5kg
Length	222mm
Width	241mm
Height	143mm

Product description

Complementary feed (powder, pellets) for horses

For demand-oriented feeding of metabolically sensitive horses with toxin-binding and prebiotic properties

In the feeding of our horses, there are ever greater barriers to overcome in order to ensure a feeding that is as close to nature as possible. Toxin contamination in the basic feed, as well as the over-supply of protein, are often the causes of metabolic overloads.

EquiGreen ToxiVet sorb contains highly efficient ingredients that can contribute to adsorbing toxins and at the same time to relieve the liver. The intestine is being supported to adsorb toxins and subsequently to excrete them. This way, it is made difficult for harmful substances to penetrate into the organism.

EquiGreen ToxiVet sorb is rich in natural B vitamins, trace elements, and essential amino acids. Due to mannan-oligosaccharides (MOS), the mucous protective barrier of the intestine and its non-specific immune system is positively influenced.

Expert tip ToxiVet sorb can also be used in combination with **GutActive** to support nutrition-related digestive disorders. However, if **GutActive** is fed at the same time, the individual products should be fed with a time delay (e.g. morning/evening). **ToxiVet sorb** has proved particularly effective as part of an intestinal cleanse with **GutClean** and **GutActive**. We also recommend additionally **EquiGreen HuminoMineral** for the supply of micronutrients.

Product properties

Phase of life	Adult, Seniors, Juniors
Feed Profile	Active & Sport, Leisure, Grain-free, Vegan, Feeding, Vegetarian, Breeding
Special Requirements	Health, Toxin binding, Diarrhea, Intestines, Fur change, Liquid dispensation, Internal organs, Metabolism
Composition	Brewer's yeast, Quick grass root, Rockrose
Animal categories	Donkeys, Horses
Product type	Supplementary feed
Product form	Powders
