For nutritional and therapy-accompanying support of the entire musculoskeletal system, especially during heavy use of the joints

Product number	6005
Weight	0.2475kg
Length	62mm
Width	62mm
Height	137mm

Product description

ArthroGreen Run-Fit is ideal for supporting the damaged joint apparatus in animals with osteoarthritis (also bone spavin and podotrochlosis in horses). This product contains highly active micronutrients and natural building blocks that help to maintain the musculoskeletal system.

The ideal mixture of purely natural herbs in ArthroGreen Run-Fit makes a significant contribution to promoting the health of the musculoskeletal system and joints as well as reducing feeding-related deficiencies. This balanced blend of herbs with special bitter substances and flavonoids supports the health of the musculoskeletal system and joints. The natural salicin contained in ArthroGreen Run-Fit, which is metabolized in the body to salicylic acid, contributes in combination with circulation-promoting ingredients to support stressed joints. The careful composition promotes joint metabolism and counteracts the harmful effects of free radicals, which can affect cell structures. This support is particularly beneficial for age-related complaints such as osteoarthritis or intensive sporting activity.

Product properties

Phase of life	Adult, Seniors
Feed Profile	Active & Sport, Leisure, Minerals / trace elements, Feeding, Without additives, Breeding
Special Requirements	Health, Deer, Calluses, Hoof capsule, Kissing Spines, Cruciate ligament tear, Bones, Patellar luxation, Arthritis / Osteoarthritis, Joints, Hip and elbow joints, Spondylosis, Musculoskeletal system
