

TurboBronchial Liquid 1 L | 1 l

Stimulation of feed intake in herds sensitive to respiratory tract - ideal for self-mixers, feed mixes and organic farms

Product number	4240
Weight	0.92kg
Length	88mm
Width	88mm
Height	230mm

Product description

In the area of ??respiratory tract infections, most of the farms have the largest reserves. An optimum respiratory tract condition and thus optimized breathing have a positive influence on the feed utilization and intake. In the case of an optimal respiratory tract condition, the susceptibility to respiratory affections is low.

In nature, the animal would absorb essential oils over the fresh plants. This is hardly guaranteed in the stable keeping of calves and pigs. Active substances contained in essential oils are particularly important for the condition of the respiratory tract, but also for digestion. In particular, the cleaning of the respiratory tracts is particularly important with regard to the high levels of germs and dust in the stables. For many companies, TurboBronchial Liquid is a matter of course in performance assurance. It can be used over the entire mast period.

Product properties

Phase of life	Adult, Seniors, Juniors
Composition	Salbei, Caraway, Eucalyptus, Thyme, Anise
Special Requirements	Autoimmune, Leistung, Antistress & Calming, Bronchi, Allergy, Respiratory tract, Fear, Cough, Lungs, Immune system, Ammonia binding
Animal categories	Cows, Pigs, Poultry
Feed Profile	Feeding, Without additives
Product type	Supplementary feed
