

TurboBronchial Plus 1 L | 1 l

Product number	3020
Weight	1.022kg
Length	88mm
Width	88mm
Height	230mm

Product description

In the respiratory tract area, most companies have the greatest power reserves. Optimum respiratory tract conditions and thus optimised breathing have a positive influence on feed conversion and intake. With optimal respiratory tract condition, the susceptibility to respiratory tract infections can be massively reduced.

TurboBronchial Plus contains highly concentrated oils (eucalyptus et al.). The aromatic substances are of purely natural origin (essential oils). In nature, the animal would absorb essential oils via the fresh plants. This is not or hardly guaranteed in the housing of pigs and poultry. The active substances contained in essential oils are particularly important for the condition of the respiratory tract but also for the digestion. TurboBronchial Plus is a matter of course for many farms when it comes to performance assurance. It can be used over the entire fattening period.

Improvement of intestinal stability - can make it difficult for parasites to settle in the gastrointestinal tract.

No separation of the product with the emulsifier. Product remains stable and is much more efficient as it is easier to mix in.

Suitable for both drinking water and feed.

NO WAITING TIMES !

You will find TurboBronchial in four variants, tailored to the different needs of the feeding method:

TurboBronchial (liquid)

TurboBronchial Liquid

TurboBronchial powder

TurboBronchial Plus
