## Product description

Natural bog consists of organic matter from primordial plants. Its numerous humic acids, minerals, and trace elements make it an excellent supplementary feed. It supports the gastrointestinal activity in a natural way and can have a regulating effect on the production of excess gastric acid when fed regularly. In addition, it has a positive influence on feces and litter eating dogs.

## Product properties

|                             |                                                                                     |
|-----------------------------|-------------------------------------------------------------------------------------|
| <b>Feed Profile</b>         | Vegan, Feeding, BARF, Without additives, Vegetarian, Leisure                        |
