Height	70mm

Product description

Not only our tongues hang in the summer to the ground. What would we do for a delicious cooling. The ice cream shop around the corner, the supermarket next door, US may provide a remedy. And who thinks of our animals? Clearly, cdVet. Dogs love a little cooling in between, horses like to lick in summer mineral stones and cats would like to steal us the scoop of ice cream from the waffle. Through increased sweating, the animals lose minerals and trace elements. With petGelato it offers the animal a great change and cooling on warm days. At the same time we fill the memory with all-natural ingredients on again. petGelato is a feed in powder form specifically for animals, which is very tasty and can be easily transformed to ice. Depending on package size, mix the corresponding amount of water. After 20 minutes of swelling time, it goes into the freezer.
