

TurboBronchial Powder 1.5 kg | 1,5 kg

To support the respiratory condition and stimulate feed intake.

Product number	290
Weight	1.5kg
Length	200mm
Width	200mm
Height	205mm

Product description

The respiratory tract is where most farms have the greatest performance reserves. Optimal respiratory condition and thus optimized respiration have a positive influence on feed conversion and intake. With optimal respiratory condition, the susceptibility to respiratory infections is low.

In nature, the animal would absorb essential oils via the fresh plants. This is hardly guaranteed in the stable keeping of ruminants, calves and pigs. The active substances contained in the essential oils are important for the condition of the respiratory tract and also for digestion. In particular, the cleaning of the respiratory tract is especially important in relation to the high germ and dust load in the stables. TurboBronchial Powder is a matter of course in performance assurance for many farms. It can be used throughout the entire fattening period.

Tailored to the different needs of the feeding method, you will find TurboBronchial Powder in different variants:

- TurboBronchial (liquid - concentrate)
- TurboBronchial Powder
- TurboBronchial Drinking Water SG
- TurboBronchial Liquid

Product properties

Phase of life	Adult, Seniors, Juniors
Composition	Salbei, Caraway, Eucalyptus, Thyme, Anise
Special Requirements	Autoimmune, Antistress & Calming, Bronchi, Allergy, Respiratory tract, Cough, Lungs, Immune system, Ammonia binding
Animal categories	Cows, Pigs, Poultry
Feed Profile	Feeding, Without additives
Product type	Supplementary feed
Product form	Powders
