

EquiGreen HuminoMineral 1 kg | 1 kg

High-quality, bioavailable nutrient provider for horses | Microminerals based on the proven EquiGreen MicroMineral additionally with HuminoMin® complex

Product number	1530
Weight	1kg
Length	99mm
Width	99mm
Height	222mm

Product description

EquiGreen HuminoMineral consists of the unique HuminoMin-Complex® and natural nutrients. It is rich in essential amino acids, vitamins, minerals, and trace elements. Particularly noteworthy is its high content of zinc and magnesium. EquiGreen HuminoMineral also contains a lot of folic acid as well as vitamin E, B vitamins, β -carotene, sulfur, potassium, and selenium.

Special feature of the HuminoMin® complex: Intestinal health and environmental conditions also play a role that should not be underestimated when it comes to the absorption and utilization of the required micronutrients. This is where the HuminoMin® complex comes in: Due to its elaborate composition, the mucous membranes of the stomach and intestine are protected and supported in their function, which favors the absorption of necessary micronutrients. In addition, the HuminoMin complex supports the regulation of acid-base balance and is characterized by excellent cell-protecting antioxidant properties.

Due to the high toxin-binding properties of the HuminoMin® complex, toxins from bacteria and fungi or also toxins supplied from outside, such as glyphosate, are already bound in the intestine and excreted via the feces. This reduces the burden on the organism because the toxins do not enter the blood, and organs and tissues remain protected. The presence of glyphosate in more and more feedstuffs, of plant and also animal origin, can lead to a deficiency of micronutrients, although there would actually be enough minerals and trace elements. These nutrients cannot be absorbed because they are bound by glyphosate.

HuminoMin® complex:

- mucosal protection for stomach and intestine
- toxin binding in the intestine
- excellent feed conversion - micronutrients are better absorbed
- cell protection through antioxidant properties
- regulation of acid-base balance
- support of the immune defense by balancing the lack of minerals

Product properties

Composition	Seaweed meal, Peat, Brewer's yeast, Grape seed flour, Sunflower, Algae, Malt
Feed Profile	Grain-free, Vegan, Minerals / trace elements, Feeding, Active & Sport, Vitamins, Vegetarian, Leisure, Breeding
Phase of life	Seniors, Adults, Juniors
Special Requirements	Toxin binding, Stomach protection, Intestines, Mucous membrane protection, Internal organs, Digestion, Immune system
Animal categories	Donkeys, Horses
Product type	Supplementary feed
Product form	Powders

HuminoMin®-Komplex:

- ✓ Toxinbindung im Darm
- ✓ Ausscheidung bevor Toxine Blut erreichen
- ✓ Organe und Gewebe bleiben geschützt

HuminoMineral

» Besteht aus dem einzigartigen HuminoMin-Komplex®

» Hoher Gehalt an Zink und Magnesium

» 100% Naturprodukt

» Hergestellt in Deutschland

100% Natürlich

- » Frei von künstlichen Zusatzstoffen
- » Ohne Konservierungsmittel
- » Ohne Füllstoffe
- » Ohne Zucker

Ausgewogene natürliche Zutaten mit antioxidativen Eigenschaften können sich positiv auf den Zellschutz auswirken.

Einfache Fütterung

» Täglich ca. 30 g/Tier dem Futter beifügen.

» 1 EL entspricht ca. 11,5 g.
Bei besonderem Bedarf (im Fellwechsel, im letzten Drittel der Trächtigkeit, während der Laktation) sollte die tägliche Fütterungsmenge auf 60-120 g/Tier erhöht werden.

Schleimhäute von Magen und Darm werden geschützt und in ihrer Funktion unterstützt, was die Aufnahme benötigter Mikronährstoffe begünstigt.
