Product description

EquiGreen insektoVet Herbal has been developed for nutrition-related support of the skin and metabolism of horses before and during the insect season. Among the vermin that bother the horses are especially ticks, mites, mosquitoes, etc. This is where a natural skin condition is of importance for our horses. In cell biological studies it could be shown that the resistance of the skin cells can be enhanced throughout the year by EquiGreen insektoVet Herbal. In particular, the barrier function of the skin cells is strengthened, which also has an important role in the natural regenerative power of the skin. feeding-related strengthening of the skin cells can contribute to an enhancement of the skin milieu supports the skin metabolism
