

EquiGreen Detox-Powder 800 g | 800 g

For needs-based feeding of metabolically sensitive horses|Supports the organism with high-quality toxin-binding nutrients

Product number	6042
Weight	0.8kg
Length	99mm
Width	99mm
Height	222mm

Product description

EquiGreen Detox-Powder contains a high proportion of bentonite-montmorillonite, which is by nature particularly suitable for more ethnic horse breeds such as Quarter Horses, Icelandic and Arabian horses. These horse breeds are genetically adapted to areas with high silicate deposits and require larger amounts of these natural mineral earths.

Toxin contamination in the basic feed, as well as the over-supply of protein, are often the causes of metabolic overloads. EquiGreen Detox-Powder contains highly efficient ingredients that can contribute to adsorbing toxins and at the same time to relieve the liver. The intestine is being supported to adsorb toxins and subsequently to excrete them. This way, it is made difficult for harmful substances to penetrate into the organism.

Contained prebiotics support the mucus-containing protective barrier of the intestine and its non-specific immune system. The combination with radical scavengers and kidney-supporting herbs makes EquiGreen Detox-Powder a must for metabolically sensitive horses that are genetically adapted to barren steppe landscapes with low-energy grasses.

Product properties

Feed Profile	Grain-free, Vegan, Feeding, Active & Sport, Vegetarian, Leisure, Breeding
Phase of life	Seniors, Adults, Juniors
Special Requirements	Health, Toxin binding, Diarrhea, Intestines, Liquid dispensation, Internal organs, Metabolism
Composition	Brewer's yeast, Grape seed flour, Nettle, Quick grass root
Animal categories	Donkeys, Horses
Product type	Supplementary feed
Product form	Powders
