

Fit-BARF GutFlora plus 250 ml | 250 ml

For nutritional support of the intestinal flora. New manufacturing process for increased efficacy through better gastric permeability.

Product number	4171
Weight	0.2525kg
Length	62mm
Width	62mm
Height	132mm

Product description

Billions of tiny microorganisms are found in the intestine. A distinction is made between pathogenic bacteria (pathogens that cause disease) and bacteria that are beneficial for healthy intestinal flora, such as lactic acid bacteria. These 'good' bacteria are hard-working helpers of the immune system and have a positive influence on digestive juices, enzymes, and the intestinal mucosa. The pathogens are properly fought and displaced. In addition, an intact intestinal flora ensures a good digestion. If the natural intestinal flora is disturbed, excessive colonization by pathogens can occur and the dog gets diarrhea. Antibiotic treatments can also attack the protective function - often the drugs do not distinguish between 'good' and 'bad' bacteria. The intestinal flora is disturbed, its defense mechanism functions only to a limited extent and the intestinal wall is adversely affected. The ancestor of our dog - the wolf - therefore also eats the digestive organs of its prey. They contain all the necessary microorganisms for a well-functioning intestinal flora. It is not always possible to feed fresh rumen or omasum. Even frozen they do not compensate for the lack of valuable bacteria and enzymes, as these are destroyed by freezing. This deficiency can be compensated very well with fermented herbs. Therefore, regular feeding with Fit-BARF DarmFlora plus is recommended, even with nutritionally disturbed intestinal flora as well as digestive problems. Displacement of pathogenic bacteria Stimulation of the immune system Improved digestion of food Maintenance of intestinal peristalsis

Product properties

Phase of life	Seniors, Adults, Juniors
Special Requirements	Health, Constipation, Diarrhea, Intestines, Stomach, Flatulence, Giardia defense, Schmatzen, Digestion, Metabolism, Earth / Grass
Composition	Yarrow, Oregano, Nettle, Peppermint, Echinacea, Fenugreek, Thyme, Hibiscus, Bedstraw, Chicory
Feed Profile	Probiotic, Feeding, BARF, Without additives, Vegetarian, Leisure
Animal categories	Dogs, Cats
Product type	Supplementary feed
Product form	Liquid

DarmFlora plus:

- ✓ fermentierte Kräuter
- ✓ Stimulation des Immunsystems
- ✓ Aufrechterhaltung der Darmperistaltik

Einfache Fütterung

Katzen & Hunde:
1,5-2 ml/5 kg Körpergewicht
1 x täglich

» Über mindestens 4-6 Wochen dem Futter beifügen. Danach wird eine regelmäßige Fütterung 1-2 x pro Woche oder je nach Bedarf empfohlen.

100% Natürlich

- » Frei von künstlichen Zusatzstoffen
- » Ohne Konservierungsmittel
- » Ohne Füllstoffe
- » Ohne Zucker

DarmFlora plus

» Fermentierte Kräuter für eine intakte Darmflora

» 100% Naturprodukt

» Hergestellt in Deutschland

In einer intakten Darmflora sind gute Bakterien fleißige Helfer des Immunsystems und haben einen positiven Einfluss auf die Verdauungssäfte, Enzyme und die Darmschleimhaut. Die Krankheitserreger werden regelrecht bekämpft und verdrängt.

Daher empfiehlt sich eine regelmäßige Fütterung mit Fit-BARF DarmFlora plus, auch bei ernährungsbedingt gestörter Darmflora sowie bei Verdauungsproblemen.
